Re: New Construction — 5503 Twilight Thicket Lane • Lot 7, Block 3, Section 5 • Plan 4720 — Walsh, Elevation C4 (right-hand)

Reference: SCR-BLD-2026-0001

The Still Creek Ranch Architectural Control Committee has reviewed the new home construction submitted by Lennar at 5503 Twilight Thicket Lane (Plan 4720, Elevation C4) and is pleased to approve it as submitted. The approved specifications follow.

Approved Specifications

Brick	Germantown (Claymex)
Trim color	Dovetail
Roof	Weathered Wood (composition shingle)

This approval is issued based on the specifications listed above. Any deviation from these specifications during construction — including substitutions of color, material, masonry coverage, fence type, or elevation — requires written re-approval prior to installation. Submitting a revised application through the builder portal is the cleanest path; the management team can typically turn material substitution requests in 24–48 hours.

Upon completion of construction, please notify the management team so a final compliance walk may be scheduled. The final walk confirms that the home was built per the approved specifications and clears the property for the homeowner closing process.

Thank you for working with the Still Creek Ranch Architectural Control Committee. Questions on this letter or future submissions may be directed to the contact information below or to **builders@bedrocktx.com**.

Sincerely,

Bedrock Association Management — ARC Review
